

GDPR Data Services

“Viscosity has earned their place as a most valued Partner for our IT department. Their professionalism and dedication allowed us to meet our commitments to internal business units, and provide a better performing, better architected system.”

- Senior Director,
IT McAfee, Inc.
(an Intel Company)

The GDPR has increased the focus on privacy throughout the single market. The regulation has significant implications for organizations that do business in Europe. Not the least of which is to avoid potential fines of 4% of worldwide annual turnover for violations.

Leverage Viscosity’s expertise in Data Security to gain the confidence in delivering best of breed technologies and solutions to assess business requirements, inventory sensitive data and develop state of the art solutions to protect data.

Viscosity is a leader in Privacy and Data Services, building secure solutions for numerous enterprise customers. Viscosity Privacy and Data Services (VPDS) create a secure foundation for protecting data and ensuring maximum usability.

Our GDPR Data Services include:

Data Offerings

- Define the high level strategy and scope.
- Understand the data and the technical, cultural and organizational capabilities and challenges
- Design an achievable solution incorporating best practices
- Build and Implement roadmap/Optimize implementation
- Transfer knowledge

Cloud Data Security

- Comprehensive Assessment of Sensitive Data
- Securing Data for Operational, Analytic and Testing Purposes
- Anonymization and Pseudonimization

Our data and security architects will work with you to analyze and understand your strategic and business goals, and then develop a customized plan for your organization. Viscosity architects are fully versed in data governance and data management as well as privacy requirements. We leverage best in class tools to enable you and your organization to achieve your goals. We are certified against all Oracle solutions including Oracle Database, Oracle Middleware platforms, Oracle Business Intelligence and Analytics, and Oracle Applications.

Whether your needs are Data, Security, Cloud or Application Development, when you lean on Viscosity, you are partnering with genuine experts and acclaimed authors of industry best practices.
